Educational Philosophy: I believe that every child is a unique individual, each deserving of equal learning experiences; socially, physically, emotionally, and intellectually. Every child learns differently and I enjoy being able to provide the necessary learning experiences in order to enhance each child's growth and well-being. I also believe that children learn best in a high spirited and stimulating environment each day filled with lots of new adventures and fun activities. Lastly, I believe that a strong and respectful relationship between teacher and parent is necessary in order to provide an open communication of counsel being beneficial to the child's growth and development inside and outside the classroom.
